**ICC DOCKET NO. 01-0662,
PHASE 1A COMPLIANCE AFFIDAVIT OF MICHAEL D. SILVER
ON BEHALF OF SBC ILLINOIS**

**STATE OF ILLINOIS
ILLINOIS COMMERCE COMMISSION**

**Illinois Commerce Commission
On Its Own Motion**

**Investigation Concerning Illinois Bell
Telephone Company's Compliance with
Section 271 of the Telecommunications
Act of 1996**

Docket No. 01-0662

**PHASE 1A COMPLIANCE AFFIDAVIT OF MICHAEL D. SILVER
ON BEHALF OF SBC ILLINOIS**

SBC ILLINOIS EXHIBIT 7.0

Dated January 22, 2003

I, Michael D. Silver, being of lawful age and duly sworn upon my oath, do hereby depose and state as follows:

I. PROFESSIONAL EXPERIENCE

1. My name is Michael D. Silver. I am an Associate Director in SBC's Wholesale Marketing group, where I am responsible for providing support to Illinois Telephone Company ("SBC Illinois"). My business address is 350 N Orleans, Chicago, IL 60654.
2. My duties include monitoring state regulatory proceedings, regulations and orders that may affect SBC's Wholesale Marketing operations or current and future interconnection agreements with Competitive Local Exchange Carriers ("CLECs"). In addition, I represent SBC's Wholesale Marketing positions to regulatory bodies. The primary responsibilities of SBC's Wholesale Marketing group are to develop and manage wholesale products and services; to support negotiations of local interconnection agreements with CLECs; to participate in state arbitration proceedings; and to guide compliance with the Telecommunications Act of 1996 ("FTA") and federal and state laws concerning the continued implementation of local exchange service competition.
3. Prior to my current position, my job responsibilities included managing Feature Group D access services, supporting Ameritech's access policies in State regulatory proceedings, interfacing with independent Local Exchange Carriers in the Ameritech region, and providing cost support for access rates. I began my career with Centel (now Sprint) developing the underlying costs for their rates. I have 22 years of experience total in the telecommunications industry.

II. PURPOSE AND EXECUTIVE SUMMARY

4. The purpose of my affidavit is to respond to certain of the requirements for supplemental information set forth in paragraphs 713 and 719 of the Illinois Commerce Commission's Phase 1A Interim Order on Investigation ("Proposed Order"). In particular, I will demonstrate that the non-recurring charges ("NRCs") for certain combinations of UNEs which the Commission Staff has identified in this proceeding as "interim" or "not yet investigated" fall reasonably within a range of TELRIC compliance. These include the NRCs applicable to new UNE-Ps, new EELs and conversions of special access circuits to existing combinations of unbundled loops and unbundled dedicated transport facilities ("SA to UNE conversions"). In order to make this demonstration, my affidavit, and associated exhibits, will show that these rates fall within a zone of reasonableness, as defined in paragraph 713 of the Proposed Order. I will also respond to the requirement that UNE-P and EEL rates be clearly defined by providing examples of typically requested UNE combinations and explaining how those rates would be billed under the Company's tariffs.

III. ZONE OF REASONABLENESS

UNE COMBINATION NRCs

5. Attachment MDS-1 through MDS-3 present comparisons of the current charges to CLECs in Illinois for new 2-wire analog loop with basic switch port UNE-P combinations, EELs, and Special Access to UNE conversions to the comparable charges in Texas, California, and Michigan. The basis of the comparisons are the effective Illinois tariffs, the Texas T2A interconnection agreement, the rates found in the California generic agreement, which reflects the OANAD cost proceeding, and the effective

Michigan tariffs. The currently effective Illinois NRCs for new UNE-P combinations, new EELs and SA to UNE conversions are included in tariff sheets approved by the Commission in its Order on Reopening issued on April 30, 2002, in Docket 98-0396. The Texas rates are the rates found in the pricing appendix in the Texas T2A generic interconnection agreement, a copy of which I have attached as Attachment MDS-6. These are the TELRIC rates that have been reviewed and approved by the Texas Commission. Generally in Texas, UNE rates are not available through tariff but are only available through an interconnection agreement or amendment. The California rates are the TELRIC rates found in the pricing appendices (Pricing Appendix Recurring (see Attachment MDS-7) and Pricing Appendix Non-Recurring (see Attachment MDS-8)) of the SBC California generic interconnection agreement. These are the rates that have been authorized by the California Public Utilities Commission in their Open Access and Network Architecture Development (“OANAD”) proceeding, and that were used to support California’s FCC 271 filing. The recurring rates can be found in Attachment A of Linda Vandeloop’s affidavit in FCC Docket WC 02-306. California received its 271 approval from the FCC on December 19, 2002. The Michigan rates reflect the TELRIC rates referenced in Michigan Public Service Commission (“MPSC”) Tariff No. 20R, Part 19 as follows:

- New UNE-P: Section 23, Original Sheets 7 and 10 cross referencing MPSC Tariff No. 20R, Part 19, Sections 2 and 3;
- New EELs: Section 19, Original Sheets 16 through 35 cross-referencing MPSC Tariff No. 20R, Part 19, Sections 2 and 12.

- Special Access to UNE Reconfiguration: Section 19, Original Sheets 8 and 9 cross-referencing MPSC Tariff No. 20R, Part 19, Section 12

NEW UNE-P NRCs

6. Attachment MDS-1 presents a comparison of the total amount of currently effective non-recurring charges to CLECs in Illinois for new UNE-P combinations to the total amount of the comparable non-recurring charges in Texas, California, and Michigan. The SBC charges are those set forth in Tariff ICC 20, Part 19, Section 15. As the Attachment shows, the SBC Illinois' NRCs for new UNE-P combinations are lower than the comparable charges in Texas, California, or Michigan.
7. Consistent with the findings in Phase 1, SBC Illinois' currently effective NRCs for new UNE-P combinations are within the range of TELRIC compliance.
8. SBC Illinois filed tariff amendments containing revised NRCs for new UNE-P combinations on December 24, 2002, and the tariffs amendments were suspended on December 30, 2002 pending investigation in ICC Docket 02-0864. The revised NRCs are supported by TELRIC cost studies.
9. Pursuant to the terms of the tariff sheets approved by the Order on Reopening in Docket 98-0396, the currently effective NRCs for new UNE-P combinations are not subject to true-up. As the Company interprets the Proposed Order (pars. 719, 720), however, the Company is being directed to amend its tariff sheets to make the rates identified in the Proposed Order as "interim", including the NRCs for new UNE-P and EEL combinations, subject to true-up effective as of the date of the Phase 1 Order. Assuming

that the Proposed Order is affirmed, therefore, SBC Illinois will revise Tariff 20, Part 19, Section 15, to include the true-up language discussed in Mr. Wardin's affidavit.

EELs

10. Attachment MDS-2, and supporting Attachments MDS-2A through MDS-2F, presents a comparison of the current recurring and non-recurring charges to CLECs in Illinois for new EELs to the comparable recurring and non-recurring charges in Texas, California, and Michigan over a 12-month and a 24-month period. The 24-month period was chosen based on the assumption that the behavior of customers ordering EELs would be similar to those customers ordering Special Access. Special Access customers tend to order for longer periods of time, i.e., 24 months, 36 months, and 60 months. The SBC Illinois charges are based on rates found in SBC Illinois' Tariff ICC 20, Part 19, Section 20, and these charges are compared to the charges for SBC Texas based on the rates found in the T2A interconnection agreement, the charges for SBC California based on the rates found in SBC California's generic interconnection agreement, which reflects the OANAD cost proceeding, and the effective tariffed rates in Michigan.
11. The Attachment compares rates for three EEL configurations; 1) a 2wire Analog Loop combined with DS1 unbundled dedicated transport ("UDT"); 2) a non-channelized DS1 loop/UDT combination; and 3) a DS1 loop combined with DS3 UDT. The costs to the CLECs reflect the recurring charges and the nonrecurring charges for each of these configurations, and are for both collocated and non-collocated EELs assuming the EEL is held for a period of 24 months.
12. The data indicates that SBC Illinois EEL NRCs are higher than the NRCs charged in either Texas, California, or Michigan. However, for each of the configurations reviewed,

the recurring charges for SBC California EELs are higher than the comparable charges for SBC Illinois.

13. The total charges (recurring plus non-recurring charges) in Illinois are less than the comparable charges in California for all three EEL scenarios presuming the CLEC holds the EEL for 24 months. Moreover, total charges in Illinois for Scenario 1; the 2W Analog Loop combined with DS1 UDT and Scenario 3; the DS1 Loop combined with DS3 UDT EEL scenarios are less than the total charges in California, even if the assumed holding period is reduced to as short a period as 12 months.
14. The data does indicate that the charges for EELs in Illinois are higher than the comparable charges in Texas and Michigan.
15. The FCC's Order authorizing 271 relief for SBC California found that SBC California's rates were "just, reasonable, and nondiscriminatory, and satisfy checklist item 2"¹. Therefore, since the total amount of SBC Illinois' EEL charges (recurring plus non-recurring) for EELs are less than the comparable charges in California, the SBC Illinois rates (including NRCs) should be considered reasonable and within the range of TELRIC compliance.
16. SBC Illinois filed new cost based EEL NRCs on December 24, 2002, and the tariffs were suspended on December 30, 2002 pending investigation in ICC Docket 02-0864.
17. As in the case of the currently effective NRCs for new UNE-P combinations, the tariff sheets approved in the Order on Reopening, which contain the currently effective new EEL NRCs, do not make those NRCs subject to true-up. As previously discussed,

¹ *In the Matter of, Application of SBC Communications, Inc., Pacific Bell Telephone Company, and Southwestern Bell Communications Services Inc., for Authorization to Provide In-Region InterLATA Services in California*; WC Docket No. 02-306; Memorandum Opinion and Order Released December 19, 2002; Par. 20

however, SBC Illinois interprets the Proposed Order as requiring SBC Illinois to amend its tariff sheets to make those e NRCs subject to true-up. Assuming that the Proposed Order's requirement is affirmed by the Commission, therefore, SBC Illinois will revise Tariff 20, Part 19, Section 20 to include true-up the language discussed by Mr. Wardin.

SPECIAL ACCESS TO UNE CONVERSION

18. There is no difference in the charges for Special Access to UNE conversions and the EELs depicted on Attachment MDS-2 for both SBC Texas and SBC California.
19. As can be seen on Attachment MDS-3, the interim \$1.02 NRC for Special Access to UNE Reconfigurations is clearly less than the corresponding NRCs for SBC Texas and SBC California and is within the range of TELRIC compliance for purposes of meeting 271 Checklist requirements.
20. SBC Illinois filed new cost based Special Access to UNE Reconfiguration NRCs on December 24, 2002, and the tariffs were suspended on December 30, 2002 pending investigation in ICC Docket 02-0864.
21. Pursuant to the Order on Reopening in Docket 98-0396, the currently effective \$1.02 NRC for SA to UNE conversions is subject to true up based on the rates ultimately approved in Docket 02-0864.

IV. CLEARLY DEFINED UNE RATES

22. The Proposed Order adopts Staff's recommendation that SBC Illinois demonstrate that its UNE rates are clearly defined by providing examples of typically requested UNE arrangements and explaining how services and products are billed under tariffs, the GIA or agreements (Proposed Order, par. 713). As I will demonstrate below, SBC Illinois'

tariffs for UNE arrangements clearly identify the rates and charges applied to specific UNE combinations.²

23. In its Order issued on October 11, 2001, the Commission directed SBC Illinois to “file new tariff sheets setting forth with specificity that NRCs that apply when various UNEs are ordered”. In this regard, the Commission suggested that “each UNE tariff have a separate section that sets forth the NRCs that apply, rather than cross-referencing other tariffs.” On January 18, 2002, the Company revised its tariffs in the manner suggested by the Commission. On May 10, 2002, the Company made additional tariff revisions agreed to with Staff and approved by the Commission in its Order on Reopening issued April 30, 2002. Accordingly, SBC Illinois’ UNE and UNE combinations tariffs comply with the requirement that the recurring and non-recurring charges applicable to each UNE and/or UNE combination be clearly identified. (See for example, Tariff ICC 20, Part 19, Section 15, Original Sheets 12 through 17(UNE-P); Tariff IL C.C. No. 20, Part 19, Section 20 3rd Revised Sheets 3-5 and Original Sheet 6 (EELs)).
24. An example of how SBC Illinois’ tariff identifies the applicable charges for specific combinations is illustrated by the tariffed NRCs applicable to a 2-wire analog loop combined with a DS1 UDT. Review of Tariff IL C.C. No. 20, Part 19, Section 20 3rd Revised Sheet 4 shows that the CLEC will be charged non-recurring charges of \$2.58 for a loop service order, \$20.21 for a loop connection, and DS1 Interoffice Transport

² Because the GIA is itself not an effective agreement a carrier may not purchase or request UNEs or combinations of UNEs directly from it. In order to obtain UNEs or combinations of UNEs as outlined in the GIA a carrier would need to request all or a particular portion of the GIA, which would then become a negotiated agreement (or portion of a negotiated agreement) that would, upon approval, allow the carrier to obtain UNEs on those terms.

Administrative charges of \$406.61 and \$632.71 for Design and Circuit C.O. Attachment MDS-4 provides 20 possible EEL scenarios, and the applicable NRCs for each scenario.

25. Similarly, the UNE-P tariff depicts the manner in which recurring and non-recurring charges are applied to UNE-P combinations purchased from the tariff (Tariff IL C.C. No. 20, Part 19, Section 15, 3rd revised Sheet 8 through 1st Revised Sheet 17). Attachment MDS-5 presents 20 possible scenarios of UNE-P combinations, and the NRCs that would apply to each scenario.

V. Summary

26. SBC Illinois' UNE combination NRCs rates fall within a zone of reasonableness, as defined in paragraph 713 of the Proposed Order. Consistent with the proposed findings in Phase 1, SBC Illinois interim UNE Combination NRCs should be found to be within the range of TELRIC compliance, and remain in effect until such time as this Commission has completed its investigation in Docket 02-0864. The currently effective NRC for SA to UNE conversions is subject to true-up pursuant to the terms of the tariff approved in the Order on Reopening in Docket 98-0396. In accordance with the requirements of the Proposed Order, the Company will revise its tariffs to also make the currently effective NRCs for new UNE-P and EEL combinations subject to true-up.
27. SBC Illinois UNE and UNE combination rates are clearly defined in Part 19 of SBC Illinois Tariff No. 20.

CONCLUSION

28. This concludes my affidavit.

I declare under penalty of perjury that the foregoing is true and correct to the best of my knowledge.

Executed on January ___, 2003

ATTACHMENT MDS-5
(SBC Illinois UNE-P Scenarios)

Scenario 1: CLEC Converts CLEC converts an existing Ameritech access line “as is” to a “Basic UNE-P” combination.
The line has the following features: Caller ID and Call Waiting.

Existing Rate Structure

Assumption:

All UNEs in the Order are for one location and of the same type

	<u>Tariff Cite</u>		<u>NRC</u>
<u>Basic Analog Loop/Basic line port</u>			
UNE-P Record Work Charge	P19, Sec. 15, Sheet 9	\$	1.02
ULS Billing Establishment	P19, Sec 15, Sheet 10	\$	138.12
 <u>Basic Analog Loop/Analog DID port</u>			
UNE-P Record Work Charge	P19, Sec. 15, Sheet 9	\$	1.02
ULS Billing Establishment	P19, Sec 15, Sheet 10	\$	138.12
 <u>Basic Analog Loop/Centrex Basic line port</u>			
UNE-P Record Work Charge	P19, Sec. 15, Sheet 9	\$	1.02
ULS Billing Establishment	P19, Sec 15, Sheet 10	\$	138.12
 <u>2-W P.B.X Ground Start Analog Loop/Ground Start Port</u>			
UNE-P Record Work Charge	P19, Sec. 15, Sheet 9	\$	1.02
ULS Billing Establishment	P19, Sec 15, Sheet 10	\$	138.12
 <u>2W Analog COPTS Coin Loop/COPTS Coin line port</u>			
UNE-P Record Work Charge	P19, Sec. 15, Sheet 9	\$	1.02
ULS Billing Establishment	P19, Sec 15, Sheet 10	\$	138.12
 <u>2W Analog COPTS Coin Loop/Basic COPTS line port</u>			
UNE-P Record Work Charge	P19, Sec. 15, Sheet 9	\$	1.02
ULS Billing Establishment	P19, Sec 15, Sheet 10	\$	138.12

Scenario 2: Converting 10 existing Ameritech access line "as is" to a "Basic UNE-P" combination
The line has the following features: Caller ID and Call Waiting.
The line has the following features: Caller ID and Call Waiting.
Existing Rate Structure

Assumption:

All UNEs in the Order are for one location and of the same type

	<u>Tariff Cite</u>		<u>NRC</u>
<u>Basic Analog Loop/Basic line port</u>			
UNE-P Record Work Charge	P19, Sec. 15, Sheet 9	\$	1.02
ULS Billing Establishment	P19, Sec 15, Sheet 10	\$	138.12
